

How to View Story City Adventures from Your Home!

Download Instructions

The Story City app is available for free and can be downloaded onto your smart phone or tablet from your local Google Play or Apple App store, or by going to the below links:

[Android Google Play](#)

[Apple iOS](#)

Make sure your device is connected to WiFi. Once the app is opened browse the stories closest to you (you should see a combination of free and paid experiences for you to select from).

How Can I Access the Story on the App from the Comfort of my Home?

Each Story City story has a start location in the city that it is set. It is only when you are standing at that location that the app will open the story and allow you to experience it. From there you may be given choices as to where to go next, be asked to solve a puzzle, or urged from one location to the next. Each choice leads you to a new location, and a new piece of the adventure. Which means you must walk the city to unfold the experience! You can see how this works by [checking out this video](#).

However, if you would like to view a story in the Story City app, when you're not in the start location, then you can follow the below instructions to be able to move through the app and stories from the comfort of your own home:

1. Download the app and make sure your WiFi or mobile data is turned on. We recommend being connected to WiFi so that you don't use all of the cellphone data on your phone.
2. In the main screen for the Story City app select the story you wish to view and go to its story overview page.
3. In the top right-hand corner, select the context menu, and 'Settings'.
4. Turn Spoiler mode 'On'.
5. Then back on the main story overview page, select the 'Start Story' button to begin.
6. You can read the story, watch the video, or have it narrated to you by pressing the 'Tap to Play Audio' buttons.

7. By selecting the 'Map' button on the bottom right you will have a map pop-up with a pin that will show you where you should be standing for that section of the story, and the options you have to continue the story.
8. Normally you would walk to the option of your choice, however, in this case you should scroll to the bottom of the screen where you will see a series of buttons allowing you to make your selection for the next piece of the story.
9. If you're playing a choose your adventure story, know that you cannot go backwards in a story using the back button. To avoid the GPS in the field from having a panic attack we have disabled this function. To view another path in an adventure first:
 - a. Use the back button in the upper left to return to the story overview page
 - b. Select the context menu in the top right of the page
 - c. Select 'Reset Story'. Then re-enter the story to navigate back to the branch you want to explore and select another path.
